

Widget Options : style

- The options related to widget style are

- `bd` is border width where the width can be in Centimetre, Inches, Meters and Pixels
- `Fg` is foreground which is the text colour
- `Bg` colour is the back ground colour

```
b1 = Button(win, text='Button 1', bd='1m', bg='red', fg='yellow')
b1.pack()
```

```
b1 = Button(win, text='Button 1', bd='1m', bg='#ffff00', fg='#ff00ff')
b1.pack()
```

- Anchor is used to position the widget in N,S,E,W,NW,NE,SE,SW,CENTER

```
b1 = Button(win, text='Button 1', bd='1m', anchor=S)
b1.pack()
```

- Relief gives different effects on a button
- The relief options are as follows

- An example of this is

```
b1 = Button(win, text='Button 1', bd='1i', anchor=S, bg='red', fg='yellow', relief=RAISED)
b1.pack()
```
